

AMENDMENTS TO THE CLAIMS

Please amend the claims as follows:

1. (currently amended) A device, comprising:
a first transparent substrate having a first surface and a second surface;
~~an~~ at least one OLED disposed on the first surface of the first transparent substrate;
a second transparent substrate having a first surface and a second surface,
wherein the first surface of the second transparent substrate is attached to the second surface of the first transparent substrate;
wherein ~~a contour of~~ the second surface of the second transparent substrate has a non-planar form because it includes a plurality of non-planar elements.
2. (currently amended) The ~~light-emitting~~ device of claim 1, wherein ~~said at least one non-planar form is~~ element is spherical.
3. (currently amended) The ~~light-emitting~~ device of claim 1, wherein the second surface of the second transparent substrate is molded.

Claims 4-20 (canceled).

21. (previously presented) The device of claim 1, wherein the first surface of the second transparent substrate is attached to the second surface of the first transparent substrate with index matching gel.
22. (previously presented) The device of claim 1, wherein the second surface of the second transparent substrate has a non-planar form because lenses are attached to the second surface of the second transparent substrate.
23. (currently amended) A method of fabricating a device, comprising:
providing a first transparent substrate having a first surface and a second surface, and having ~~an~~ at least one OLED disposed on the first surface of the first transparent substrate;

providing a second transparent substrate having a first surface and a second surface, wherein the second surface of the second transparent substrate is has a non-planar form because it includes a plurality of non-planar elements;

attaching the second surface of the first transparent substrate to the first surface of the second transparent substrate.

24. (currently amended) The method of claim 23, wherein ~~the second surface of the second transparent substrate includes spherical shapes~~ at least one non-planar element is spherical.

25. (currently amended) The method of claim 23, wherein the second surface of the second transparent substrate layer ~~layer~~ is molded.

26. (previously presented) The method of claim 23, wherein the first surface of the second transparent substrate is attached to the second surface of the first transparent substrate with index matching gel.

27. (currently amended) The ~~device~~ method of claim 23, wherein the second surface of the second transparent substrate has a non-planar form because lenses are attached to the second surface of the second transparent substrate.

28. (new) The device of claim 2, wherein at least one OLED is positioned at the approximate center of curvature of at least one spherical non-planar element.

29. (new) The method of claim 24, wherein at least one OLED is positioned at the approximate center of curvature of at least one spherical non-planar element.
